

Standard angle control valve RC220

Features

- Control valve in sizes 1", 3/4", 1/2" and 1/4"
- Angle barstock body
- Maximum allowable pressure 340 bar
- Suitable for control of medium and low flow.
- Many variations not listed here

Applications

Suitable for control of liquids, gases or steam, in industrial applications, research, and process pilot plants. Its compact size makes it an ideal choice for additive injection, sampling, low flow hydraulic systems or wherever precise control is an important factor or physical constraints limit valve weight or size.

Connections

Standard is NPT-internal thread.
For other types, see **Data Sheet CON.**

Guiding

Standard as pictured on page 2 or optional medium and heavy duty guiding **Data Sheet GDG.**

Bonnet

Standard as pictured on page 2. Other types available as for example:
Cooling fin bonnet **Data Sheet CFG**
Bellows sealed bonnet **Data Sheet BLW**

Packing

Standard are PTFE chevron rings.
For other type, see Data Sheet PCK.

Pneumatic actuator

Die cast Aluminium with Epoxy paint, optional 316L S/S (Stainless Steel) but only for 1/2" valves.
Standard actuator "Spring to close" **Data Sheet AC-OS**
Standard actuator "Spring to open" **Data Sheet AC-CS**
With integrated pneumatic positioner:
Standard actuator "Spring to close" **Data Sheet AC-OP**
Standard actuator "Spring to open" **Data Sheet AC-CP**
Various accessories on request.

Electric actuator

Various special types available: explosion proof,
Safety position "Spring to open" or "Spring to close".
Electric **Data Sheet AC-HH500 AC-M60WE**
Electronic **Data Sheet AC-EVA1 AC-MC60**

Dimensions

max. pressure in bar

STD = standard bonnet. Details about bonnet length CF and EF, see Data Sheet CFG

The above pressure ratings alone are not sufficient to determine if a valve is suitable for an application. You can find help for selection of innervalue, material combinations, guiding, bonnet and actuator in the "instruction for valve selection" and the Data Sheets TRM, GDG, CFL resp. AC.
